Assignment #8 "Storyboard"

DELIVERABLES

Create a storyboard for the collaborative project we have been working on. The storyboard should be completed in Toon Boom Harmony.

COMMENTS

This assignment will be evaluated in terms of how well it tells the story that you came up with. Consider elements such as framing and composition, color, and narrative details; all while communicating the tone of the script. Consider also that the storyboard will need to be turned into an animation, so efficiency in storytelling is significant.

MOTIVATION

The 2009 file *Coraline* was created using many preliminary materials, including the storyboard image below. While quickly drawn, it evinces the tone of the story and this particular scene.
