## Assignment #6 "Midterm"

Create a 42-second animation. The animation should assume a frame rate of 24 frames per second, meaning that the animation must span a total of exactly 1008 frames (no more, no less). The animation must also be exported as an mp4 file. The story that the animation tells must be original.

Animation excels at telling stories, combining visual, verbal, and musical content across time. In this assignment, create a story of your own that demonstrates these abilities of animation. The animation elements you include are up to you, but use the techniques we have discussed as appropriate (e.g. lip synching, bones and rigging, and motion keyframe animation).

The Oscars (or Academy Awards) each year presents an award for Best Animated Short Film, the most recent winner being "Hair Love".
