Assignment #14
"Final Test"

» DELIVERABLES

Our final test will ask you to create a program that demonstrates understanding of four major topics:

- The syntax and use of the C programming language.
- The use of classes, with inheritance.
- The ability to algorithmically modify numerical data.
- Familiarity with common C library functions and linking protocols.

You will have 1.5 hours to complete the task assigned and upload it to a new Github repository.
