Assignment #7
"Midterm"

» » » » » » » » » » » » » » » » » DELIVERABLES

Create a 30-second animation. The animation should assume a frame rate of 24 frames per second, meaning that the animation must span a total of exactly 720 frames (no more, no less). The animation must also be exported as an mp4 file. The story that the animation tells must be original.

» » » » » » » » » » » » » » » » » » COMMENTS

3D animation isn't just about the process of creation; it's also about telling stories. 3D animations excel at conveying narratives, offering viewers the ability to enter a 3D world that is entirely invented. For this assignment, the choice of techniques used is up to you, but draw from all those that we have covered so far, and use them to best advantage (e.g. Blender keyframes, rigging, ZBrush, Substance Painter).

» » » » » » » » » » » » » » » » » MOTIVATION

The Oscars (or Academy Awards) each year presents an award for Best Animated Short Film, the 2018 winner being *Bao*, a 3D-animated film about a dumpling.
