Assignment #0
"Software"

» » » » » » » » » » » » » » » » » DELIVERABLES

Install **Toon Boom Harmony Essentials** on a laptop you can use at home and at class.

» » » » » » » » » » » » » » » » » » » BRIEF

Toon Boom Harmony is the single software most highly associated with **broadcast cartoons**; it will be our base software for this course.

Subscriptions to Harmony are on a tiered model; for this course, you are required to subscribe to the Essentials version, which is $24/month with no contract. Toon Boom also offers a 21-day free trial which you can use to reduce costs.

Students are required to use their own laptops in the course (either a college-provisioned Surface Pro or a personal Windows/macOS laptop). If you are using your Surface Pro, you will need to have the Help Desk enter an administrator's password to complete installation.

» » » » » » » » » » » » » » » » » MOTIVATION

Given Harmony's ubiquity, it wouldn't hurt to spend some time sampling cartoons through your favorite streaming service to get a sense of what's possible.
